Caution regarding forward-looking statements

From time to time, Manulife makes written and/or oral forward-looking statements, including in this presentation. In addition, our representatives may make forward-looking statements orally to analysts, investors, the media and others. All such statements are made pursuant to the “safe harbour” provisions of Canadian provincial securities laws and the U.S. Private Securities Litigation Reform Act of 1995.

The forward-looking statements in this presentation include, but are not limited to, statements with respect to the Company's strategic priorities and 2022 targets for net promoter score, employee engagement, its high potential businesses, expense efficiency and portfolio optimization; its medium-term targets for core EPS growth, core ROE, leverage ratio and common share dividend payout ratio; the expected expense efficiencies in 2019; the expected releases of capital from announced initiatives, the estimated impact of our annual review of actuarial methods and assumptions; and also relate to, among other things, our objectives, goals, strategies, intentions, plans, beliefs, expectations and estimates, and can generally be identified by the use of words such as “will”, “expect”, “estimate”, “believe”, “plan”, “objective”, “continue”, and “goal”, (or the negative thereof) and words and expressions of similar import, and include statements concerning possible or assumed future results. Although we believe that the expectations reflected in such forward-looking statements are reasonable, such statements involve risks and uncertainties, and undue reliance should not be placed on such statements and they should not be interpreted as confirming market or analysts’ expectations in any way.

Certain material factors or assumptions are applied in making forward-looking statements and actual results may differ materially from those expressed or implied in such statements. Important factors that could cause actual results to differ materially from expectations include but are not limited to: general business and economic conditions; changes in laws and regulations; changes in accounting standards applicable in any of the territories in which we operate; changes in regulatory capital requirements applicable in any of the territories in which we operate; our ability to execute strategic plans and changes to strategic plans; downward trends in our financial strength or credit ratings; our ability to maintain our reputation; impairments of goodwill or intangible assets or the establishment of provisions against future tax assets; the accuracy of estimates relating to morbidity, mortality and policyholder behaviour; the accuracy of other estimates used in applying accounting policies, actuarial methods and embedded value methods; our ability to implement effective hedging strategies and unforeseen consequences arising from such strategies; our ability to source appropriate assets to back our long-dated liabilities; level of competition and consolidation; our ability to market and distribute products through current and future distribution channels; unforeseen liabilities or asset impairments arising from acquisitions and dispositions of businesses; the realization of losses arising from the sale of investments classified as available-for-sale; our liquidity, including the availability of financing to satisfy existing financial liabilities on expected maturity dates when required; obligations to pledge additional collateral; the availability of letters of credit to provide capital management flexibility; accuracy of information received from counterparties and the ability of counterparties to meet their obligations; the availability, affordability and adequacy of reinsurance; legal and regulatory proceedings, including tax audits, tax litigation or similar proceedings; our ability to adapt products and services to the changing market; our ability to attract and retain key executives, employees and agents; the appropriate use and interpretation of complex models or deficiencies in models used; political, legal, operational and other risks associated with our non-North American operations; acquisitions or divestitures, and our ability to complete transactions; environmental concerns; our ability to protect our intellectual property and exposure to claims of infringement; and our inability to withdraw cash from subsidiaries.

Additional information about material risk factors that could cause actual results to differ materially from expectations and about material factors or assumptions applied in making forward-looking statements may be found under “Risk Management and Risk Factors Update” and “Critical Accounting and Actuarial Policies” in our 2Q19 Management's Discussion and Analysis and under “Risk Management and “Risk Factors” in the Management's Discussion and Analysis and in our most recent annual report and, in the “Risk Management” note to consolidated financial statements in our most recent annual and interim reports and elsewhere in our filings with Canadian and U.S. securities regulators. The forward-looking statements in this presentation are, unless otherwise indicated, stated as of the date hereof and are presented for the purpose of assisting investors and others in understanding our financial position and results of operations, our future operations, as well as our objectives and strategic priorities, and may not be appropriate for other purposes. We do not undertake to update any forward-looking statements, except as required by law.

¹ The Source of Earnings (SOE) analysis is prepared following OSFI regulatory guidelines and draft guidelines of the Canadian Institute of Actuaries. The SOE is used to identify the primary sources of gains or losses in each reporting period. The expected profit from in-force business denominated in foreign currencies is translated at the current quarter’s statement of income rate.

- Higher expected profit on in-force driven by Asia, partially offset by portfolio optimization initiatives on our legacy businesses
- Solid new business gains despite temporary suspension of COLI sales in Japan
- Unfavourable policyholder experience driven by adverse large-claims experience in U.S. life
- Higher investment income on surplus funds and lower debt expense
Double-digit core earnings growth in Asia and solid core ROE

On track to achieve $1 billion in expense efficiencies by 2022

- Expect to deliver $700 million of expense efficiencies in 2019, $400 million of which is incremental in 2019
- Expense initiatives have already delivered significant efficiencies:
  - Process improvements (including: re-design, straight-through-processing, digitization, and automation)
  - Real Estate consolidation
  - Vendor rationalization and re-negotiation
  - Organizational structure

Total annual expense efficiencies
(C$ millions, pre-tax)

- $1 billion target
- $700 million in expected bottom line impact in 2019
- $300 million bottom line impact in 2018

Note: See “Caution regarding forward-looking statements” above.
Continued discipline on costs has notably slowed the growth of general expenses included in core earnings.

- APE sales: 139 (2Q19), 139 (2Q18)
- New business value: 89 (2Q19), 89 (2Q18)

### Notes:
- Higher core earnings driven by improved policyholder experience and in-force business growth, partially offset by lower new business volumes in Japan.
- Higher NBV driven by a more favourable business mix, partially offset by lower sales in Japan.
- Lower APE sales as growth in Hong Kong and Asia Other was offset by lower Japan COLI sales.

Note: Percentage changes are stated on a constant exchange rate basis, a Non-GAAP measure. See “Performance and Non-GAAP Measures” below. Order of the vertical bars on the chart correspond to the order in the legend.
Core earnings decreased 21%, driven by the 2Q18 release of provisions for uncertain tax positions and favourable policyholder experience. NBV in line with 2Q18 as higher insurance sales were offset by business mix in group insurance and the withdrawal of certain capital-intensive annuity products. Higher APE sales driven by a large-case group insurance sale and growth across our individual insurance business.

Performance and Non-GAAP Measures

Manulife uses a number of non-GAAP financial measures to measure overall performance and to assess each of its businesses. A financial measure is considered a non-GAAP measure for Canadian securities law purposes if it is presented other than in accordance with generally accepted accounting principles used for the Company’s audited financial statements. Non-GAAP measures include core earnings (loss); core ROE; diluted core earnings per common share (“core EPS”); core earnings before income taxes, depreciation and amortization (“core EBITDA”); core EBITDA margin; core investment gains; constant exchange rate basis (measures that are reported on a constant exchange rate basis include percentage growth/declines in net income attributed to shareholders, core earnings, sales, APE sales, gross flows, core EBITDA, new business value and assets under management and administration); capital; embedded value; new business value; new business value margin; sales; APE sales; gross flows; net flows; assets under management and administration; and expense efficiency ratio. Non-GAAP financial measures are not defined terms under GAAP and, therefore, are unlikely to be comparable to similar terms used by other issuers. Therefore, they should not be considered in isolation or as a substitute for any other financial information prepared in accordance with GAAP. For more information on non-GAAP financial measures, including those referred to above, see “Performance and Non-GAAP Measures” in our 2Q19 Management’s Discussion and Analysis.
