

The Manulife Longevity Institute is driving action to help people live longer, healthier, and more financially secure lives.

Longevity is not just about adding years—it’s about making those years vibrant, supported, and full of possibility, good health and financial security.

Manulife is investing **\$350 million by 2030 through** this global platform.

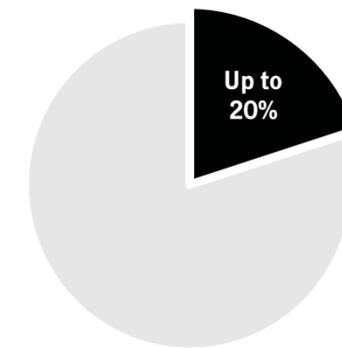

The Institute will focus on:

- igniting global research and thought leadership to better understand how people can flourish as they live longer
- accelerating innovation and advocacy through initiatives that promote health, wellness, and financial readiness
- investing in community partnerships that advance knowledge, promote equity, and drive action around longevity

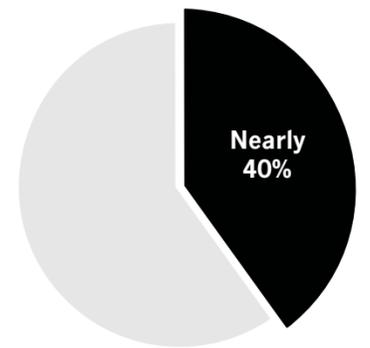

People are living *longer*.

By **2050**, the number of people aged **over 60** is expected to double to **2.1 billion** globally.

But people are underprepared to live well while they age.

People spend up to **20%** of their lives in poor health

Nearly **40%** face financial insecurity as they age

Longevity
Institute

“Empowering health, wealth, and longevity is central to Manulife’s bold new ambition. It aligns with our values, our commitment to the communities we operate in, and we are uniquely placed to help individuals and families navigate the growing gap between lifespan and healthspan.”

— Phil Witherington, President & CEO, Manulife

Investing in research and thought leadership

Driving innovation and advocacy

Fostering community partnerships

Financial Resilience and Longevity Report
