The products and services offered by Manulife Investment Management and Trust Corporation (Trustee/Investment Manager) are not deposit accounts and are not insured by the Philippine Deposit Insurance Corporation (PDIC). These are not obligations of, and are not guaranteed or insured by the Trustee/Investment Manager, its parent company or affiliates and does not carry any guarantee on returns. Any loss/income is for the account of the client. The Trustee/Investment Manager is not liable for losses, except losses attributable to its willful default, bad faith and gross negligence.

This Client Suitability Assessment (CSA) is done prior to account opening and is intended to assist you in understanding your own ability and willingness to take risks based on your personal profile, financial situation, objective, time frame, preference, tolerance and experience while you decide on which investments may be suitable for you. This will continue to be applied for any subsequent principal contributions to the account, until such is amended or updated by the client. However, this is not intended to be a complete and full assessment, there might be other variables affecting your risk tolerance that are not taken into consideration, thus your final choice may be different based on further discussion with your Sales Personnel/Wealth Specialist. Your risk profile changes over time and we encourage you to do an assessment at least every three (3) years or as your needs and situation change.

I acknowledge that I have explained the CSA process and the resultant risk profile to the client.

Type	Score	General Risk Profile Description
Conservative	4-10 pts	Low capacity to assume risk, not willing to tolerate "noticeable downside market fluctuations" and are prepared to forego significant upside potential. A fund invested in primarily fixed income instruments may be suitable for you.
Moderate	11-28 pts	Moderate risk tolerance, comfortable with modest short term capital losses and fluctuations in your investment in anticipation of higher return. A fund composed predominantly of fixed income instruments mixed with high-risk equities appears suitable for you.
Aggressive	29-35 pts	Willing to assume a high level of risk and may be prepared to lose majority of your money in exchange for the highest possible return. You might prefer a fund allocation which is almost entirely biased towards equities and/or denominated in foreign currencies.

Risk Profile Based on the Total Score:

IMPORTANT: If answer to Q6 is "A", risk rating should be "Conservative" regardless of total score. If answer to Q6 is "B", risk rating should be capped at "Moderate", regardless of total score.

* Represents the sum of the score for each question

Your Score*:

Question No.	A	B	C	D	E	F	Notes	Score
Question 1	5	3	6	4	2	1		
Question 2	0	1	2	3	4			
Question 3	1	2	3	5	7	0	If answer to Q2 is "A", this should be "F". Otherwise, if client has multiple answers, choose the answer carrying the highest point only.	
Question 4	1	2	3	4	6			
Question 5	1	2	3	5	7			
Question 6	1	2	3	4	5		If answer is "A", risk rating should be "Conservative", regardless of total score. If answer is "B", risk rating should be capped at "Moderate", regardless of total score.
