Peso Bond Fund

Market Review

The local bond market held on to gains as expectations on easing inflation and monetary policy remain intact. Indeed, the Bangko Sentral ng Pilipinas (BSP) proceeded with its planned 25bps rate cut mid-August despite the uptick of local inflation in July. Similarly, the U.S. bond market remained strong with U.S. 10-year yields staying below 4% and the market pricing in up to 100bps of total rate cuts from the Federal Reserve this year.

Outlook

Looking ahead, we maintain a positive view on the local bond market, especially as the uptick in July inflation proved to be temporary. August inflation eased to 3.3% due to slower increase in food prices and decline in transport costs. With the likelihood of a reserve requirement ratio and another policy rate cut this year, we can expect interest rates to decline further and market retracements to be shallow.

The investment fund option for The Manufacturers Life Insurance Company's variable life insurance product is managed by Manulife Investment Management and Trust Corporation.

The Fund mentioned in this document is specific to variable life insurance contracts and is not considered a mutual fund. Yields depend on interest and foreign exchange rate levels, both of which may fluctuate. Other factors that affect yield include changes in the credit standing of the issuers and changes in the value of the stocks and dividends received. Further, investments of the Fund may provide that their values be determined based on prices or yields of other securities, instruments or foreign currencies, and such provisions may result in negative fluctuations in the value of these investments and, in turn, the Fund's yields. Thus, the performance of the separate account(s) is not guaranteed and the value of the policy could be less than the capital invested. THE VARIABLE LIFE POLICYHOLDER SHALL BEAR ALL INVESTMENT RISKS. Past performance of the Fund is not necessarily indicative of future performance. Yields are not guaranteed.
