Peso Bond Fund

Market Review

On October 9, the Bangko Sentral ng Pilipinas cut its policy rate by 25 basis points to 4.75%, citing downside risks to GDP due to public infrastructure spending concerns, typhoon season, and higher U.S. tariffs. However, the BSP also projects 2025 inflation at 1.7%, with levels expected to stay within the 2–4% target range thereafter. This set the tone which led local bond yields to decline 11 basis points on average.

Later in the month, global risks resurfaced: U.S.–China trade tensions flared with threats of restrictive policies, while the Fed cut its policy rate by 25 bps to balance inflation and growth. These developments capped further yield declines locally as investors locked in gains to close the month.

Outlook

As global trade risks begin to ease and with the backdrop of relatively stable Philippine fundamentals, we maintain a positive view on the local fixed income market while keeping a cautious stance. We will continue to capitalize on yield upticks, keeping a defensive duration position.

The investment fund option for The Manufacturers Life Insurance Company's variable life insurance product is managed by Manulife Investment Management and Trust Corporation.

The Fund mentioned in this document is specific to variable life insurance contracts and is not considered a mutual fund. Yields depend on interest and foreign exchange rate levels, both of which may fluctuate. Other factors that affect yield include changes in the credit standing of the issuers and changes in the value of the stocks and dividends received. Further, investments of the Fund may provide that their values be determined based on prices or yields of other securities, instruments or foreign currencies, and such provisions may result in negative fluctuations in the value of these investments and, in turn, the Fund's yields. Thus, the performance of the separate account(s) is not guaranteed and the value of the policy could be less than the capital invested. THE VARIABLE LIFE POLICYHOLDER SHALL BEAR ALL INVESTMENT RISKS. Past performance of the Fund is not necessarily indicative of future performance. Yields are not guaranteed.
