Portfolio Breakdown

Asset Allocation (at Market Value)

As per the fund's Investment Policy Statement, initial subscriptions are invested in fixed 100% Equity Pool. The investments of the Equity Pool consist of stocks listed on the Philippine Stock Exchange and term deposits.

Emperor Fund

Market Review

The Philippine Stock Exchange Index is down -0.75% MTD in August, settling at 5,884.18 points. Negative sentiment from weak 2Q economic and corporate results led to profit taking towards the latter part of the month, offsetting the 3.8% rise in the first two weeks following the reposition of the Modified Enhanced Community Quarantine (MECQ) for NCR and neighboring provinces to control the spread of COVID-19.

Congress in August passed the Bayanihan Act 2 and is awaiting President Rodrigo Duterte's signature. Bayanihan 2 allots P140bn in additional funds to support sectors such as agriculture, tourism, and disease control. Other stimulus bills pending in Congress include the CREATE Bill (lowering of corporate income taxes), the GUIDE Bill (creates a bailout fund and corporate guarantees) and an additional stimulus to specific MSME sectors, ARISE Bill.

Under the current GCQ restrictions, we are seeing improved mobility restrictions which bodes well for economic output. PAGCOR, the gaming regulator, also allowed integrated casino resorts to begin trial operations for invited guests of up to 30% capacity starting last August 24. Capacity limits are still in place for businesses and public transportation that are operating under the current General Community Quarantine (GCQ) restrictions.

Outlook

We remain cautious on the equity market as the COVID-19 pandemic continues to impact the country's economic output. We continue to be mindful of factors that will impact the country's GDP such as unemployment trends and signs of weak consumer sentiment arising from the effects of prolonged mobility restrictions. We remain weighted in resilient sectors but look to take advantage of cheap valuations to accumulate stocks in sectors that will be the new winners once the economy reopens and recovers.

The investment fund option for Manulife China Bank Life Assurance Corporation's variable life insurance product is managed by Manulife Asset Management and Trust Corporation.

The Fund mentioned in this document is specific to variable life insurance contracts and is not considered a mutual fund. Yields depend on interest and foreign exchange rate levels, both of which may fluctuate. Other factors that affect yield include changes in the credit standing of the issuers and changes in the value of the stocks and dividends received. Further, investments of the Fund may provide that their values be determined based on prices or yields of other securities, instruments or foreign currencies, and such provisions may result in negative fluctuations in the value of these investments and, in turn, the Fund's yields. Thus, the performance of the separate account(s) is not guaranteed and the value of the policy could be less than the capital invested. THE VARIABLE LIFE POLICYHOLDER SHALL BEAR ALL INVESTMENT RISKS. Past performance of the Fund is not necessarily indicative of future performance. Yields are not guaranteed.
