

Peso Wealth Optimizer Fund 2026

An investment fund option for variable life insurance products of **The Manufacturers Life Insurance Co., (Phils), Inc.**

Investment Objective

The Fund seeks to maximize long-term capital growth while managing the risk of capital erosion as the target date approaches through a dynamic rebalancing of exposure to diversified portfolios of peso-denominated fixed income securities and securities listed on the Philippine Stock Exchange and/or pooled funds that invest in these securities and other liquid fixed income instruments.

Past performance is not an indication of future results. Information about the portfolio's holdings, asset allocation, or country diversification is historical and is not an indication of future portfolio composition, which will vary.

Why Peso Wealth Optimizer Funds?

Investing through a target date approach simplifies asset allocation for an average investor. The asset mix changes over time, becoming more conservative as the investor's financial milestone draws closer.

The change in asset allocation over time is called the **glide path** which Manulife designed specifically for these funds.

The glide path's objectives include:

- To maximize wealth accumulation prior to target date
- To minimize risk as the target date approaches
- To make wealth last long enough to support any financial needs beyond the chosen target date

Top Five Holdings

Bond Pool		Short-Term Bond Pool	
FXTN 03/04/27	15.12%	Manulife Stable Income Fund Class I	35.30%

-Short Term Bond Pool: Peso-denominated bonds of the Republic of the Philippines with a term of up to three years and term deposits.

Peso Wealth Optimizer Fund 2026

Market Review

The Philippine Stock Equity index (PSEi) continued its rally, rising by 9% in November to reaching 6,780. The November rally cut the PSEi's losses for the year to -3%. Improving global macroeconomic picture and the peso's recovery further lent support to the market's strength. We also saw strong 3Q22 corporate earnings with majority of index stocks reporting in line to above results compared to consensus expectations.

October inflation accelerated indicating that overall basket of prices were up 7.7% compared to the same month the prior year. This October inflation figure is higher from 6.9% reported in the prior month, and significantly above market expectations. Meanwhile, the Bangko Sentral ng Pilipinas raised policy rates by 75bps, mirroring the move of the US Federal Reserve. On the positive side, the US Federal reserve mentioned that they could start easing the aggressiveness in rate hikes given the deceleration in US inflation. As a result, we saw a correction in yields and US dollar, fueling a stronger Philippine Peso. Note that the Philippine Peso has appreciated by around 3% in the past month.

Philippine economic activity continues to improve as evidenced by the acceleration in commercial bank loans growth to 13.9% year on year in October. The growth in loans was driven by higher personal consumption and production by activities. Meanwhile, OFW remittances were up 3.8% year on year and unemployment rate declined to 5% in September.

Bonds bucked the trend in November as the recent slowdown in U.S. inflation fueled expectations of smaller rate hikes from both the Federal Reserve (Fed) and the Bangko Sentral ng Pilipinas (BSP). Prices in the U.S. rose by 7.7% year-on-year in October, the lowest inflation print since January this year. This led to Fed officials stating that while rates may peak at a higher level than previously expected, it would soon moderate the pace of rate hikes to mitigate risks of overtightening, as revealed in the minutes of their latest policy meeting. After their 75bps hike last month, we expect the Fed and the BSP to deliver a 50bps hike before we end the year.

Outlook

We have a neutral view on Philippine Equities as attractive valuations and strong corporate earnings are mitigated by concerns over global macroeconomy. Currently, the Philippine Equity Index is trading at around 14x forward price to earnings, a slight discount to historical average of around 15x. We also continue to be optimistic on strong corporate earnings in the past two quarters as the recovery consumer spending pushed overall revenues higher. However, we continue to see weakness in the economy brought about by high local inflation and rising interest rate environment. The higher interest rate environment could lead to lower economic growth in 2023 onwards.

Unfortunately, while the BSP has been following the Fed's rate hikes as of late, domestic inflation is not mirroring the trend of U.S. inflation. With the latest inflation print of 8% in November and possible price pressures induced by holiday spending, it may take a few more months before domestic inflation peaks. Nevertheless, as the Philippine Peso finally took a U-turn and is now settling at 56-levels, we are seeing an improvement in risk appetite as impatient investors look to deploy excess cash. We maintain our view that current yield levels are attractive for investors with a longer investment horizon.

The investment fund option for The Manufacturers Life Insurance Company's variable life insurance product is managed by Manulife Investment Management and Trust Corporation.

The Fund mentioned in this document is specific to variable life insurance contracts and is not considered a mutual fund. Yields depend on interest and foreign exchange rate levels, both of which may fluctuate. Other factors that affect yield include changes in the credit standing of the issuers and changes in the value of the stocks and dividends received. Further, investments of the Fund may provide that their values be determined based on prices or yields of other securities, instruments or foreign currencies, and such provisions may result in negative fluctuations in the value of these investments and, in turn, the Fund's yields. Thus, the performance of the separate account(s) is not guaranteed and the value of the policy could be less than the capital invested. THE VARIABLE LIFE POLICYHOLDER SHALL BEAR ALL INVESTMENT RISKS. Past performance of the Fund is not necessarily indicative of future performance. Yields are not guaranteed.
