

Peso Wealth Optimizer Fund 2026

An investment fund option for the variable life insurance products of **The Manufacturers Life Insurance Co., (Phils), Inc.**

Investment Objective

The Fund seeks to maximize long-term capital growth while managing the risk of capital erosion as the target date approaches through a dynamic rebalancing of exposure to diversified portfolios of peso-denominated fixed income securities and securities listed on the Philippine Stock Exchange and/or pooled funds that invest in these securities and other liquid fixed income instruments.

Past performance is not an indication of future results. Information about the portfolio's holdings, asset allocation, or country diversification is historical and is not an indication of future portfolio composition, which will vary.

Why Peso Wealth Optimizer Funds?

Investing through a target date approach simplifies asset allocation for an average investor. The asset mix changes over time, becoming more conservative as the investor's financial milestone draws closer.

The change in asset allocation over time is called the **glide path** which Manulife designed specifically for these funds.

The glide path's objectives include:

- To maximize wealth accumulation prior to target date
- To minimize risk as the target date approaches
- To make wealth last long enough to support any financial needs beyond the chosen target date

Top Five Holdings

Bond Pool		Short-Term Bond Pool	
FXTN 03/12/24	14.58%	Manulife Stable Income Fund Class I	33.73%

-Short Term Bond Pool: Peso-denominated bonds of the Republic of the Philippines with a term of up to three years and term deposits.

Peso Wealth Optimizer Fund 2026

Market Review

The Philippine stock market index (PSEi) closed June at 6,208, up 6.3% for the month. The market move was attributable to a series of positive news flow both local and abroad. Locally, Metro Manila loosened its quarantine restrictions from a Modified Enhance Community Quarantine (MECQ) to General Community Quarantine (GCQ), while Cebu City was reverted back to the strictest ECQ restrictions as infections in Western Visayas continue to rise. Nevertheless, mobility and operational capacity for NCR remain limited as public transportation are allowed to operate but at limited capacities. Restaurant dine-in services are now allowed but with 30% capacity limits as well. In the United States, jobs and retail sales data came in stronger-than-expected. The US Fed also boosted monetary support via additional asset purchases, which now includes corporate bonds.

In an unexpected move, the BSP lowered policy rates by another 50bps to 2.25%. BSP Governor Diokno said the cuts are necessary to boost the economy and market confidence. For the year, the BSP has already cut 175bps in policy rates. Meanwhile, inflation eased to 2.1% YoY in May from 2.2% in April, bringing the year-to-date inflation figure to 2.5%.

In the corporate front, two local banks were implicated in a financial accounting scandal involving a German payments company which is centered on a missing sum of EUR1.9Bn. Both banks denied the allegations and said that the missing funds never entered the Philippines.

The first three weeks of June saw bond yields move higher as supply risks dominate the market amid news of a possible retail treasury bond (RTB) issuance. The Monetary Board meeting held June 25 brought a huge surprise as the Bangko Sentral ng Pilipinas (BSP) announced a 50bps rate cut. Governor Diokno noted that the reduction in policy rates was a preemptive move amid a weak global growth view. A strong rally ensued following the cut, erasing the uptick in local bond yields for the month.

Outlook

As the economy continues to reopen and adjust towards a new normal, we expect cyclical linked sectors to take the front seat in terms of performance recovery for the remainder of the year. Our outlook for the market is still neutral as we expect heightened market volatility to remain as 2Q20 earnings downgrades continue to remain a possibility, having felt the blunt of the lockdown period. However, we are encouraged to see early signs of economic recovery through some leading economic indicators like electricity demand and auto sales which have been slowly picking up during the GCQ period. We are starting to look at opportunities in the more cyclical sectors like industrials and consumer discretionary that offer growth should the recovery pick up pace in the succeeding quarters.

Bond yields have trended lower an average of 30bps following BSP's move, but additional downside may be limited given recent rhetoric from the BSP. In addition, the longer dated bond issuances (7 and 10 years) scheduled for July and the potential RTB supply continue to dampen investor sentiment. Against a backdrop of increasing local Covid-19 cases and a possible lifting of the lock-down restrictions on Metro Manila, investors are cautious amid the numerous uncertainties in the market. The funds are positioned with a neutral duration relative to the benchmark to withstand possible volatility in the bond market.

The investment fund option for The Manufacturers Life Insurance Company's variable life insurance product is managed by Manulife Asset Management and Trust Corporation.

The Fund mentioned in this document is specific to variable life insurance contracts and is not considered a mutual fund. Yields depend on interest and foreign exchange rate levels, both of which may fluctuate. Other factors that affect yield include changes in the credit standing of the issuers and changes in the value of the stocks and dividends received. Further, investments of the Fund may provide that their values be determined based on prices or yields of other securities, instruments or foreign currencies, and such provisions may result in negative fluctuations in the value of these investments and, in turn, the Fund's yields. Thus, the performance of the separate account(s) is not guaranteed and the value of the policy could be less than the capital invested. THE VARIABLE LIFE POLICYHOLDER SHALL BEAR ALL INVESTMENT RISKS. Past performance of the Fund is not necessarily indicative of future performance. Yields are not guaranteed.
