

# Peso Wealth Optimizer Fund 2031

An investment fund option for variable life insurance products of **The Manufacturers Life Insurance Co., (Phils), Inc.**

## Investment Objective

The Fund seeks to maximize long-term capital growth while managing the risk of capital erosion as the target date approaches through a dynamic rebalancing of exposure to diversified portfolios of peso-denominated fixed income securities and securities listed on the Philippine Stock Exchange and/or pooled funds that invest in these securities and other liquid fixed income instruments.

Past performance is not an indication of future results. Information about the portfolio's holdings, asset allocation, or country diversification is historical and is not an indication of future portfolio composition, which will vary.

## Why Peso Wealth Optimizer Funds?

Investing through a target date approach simplifies asset allocation for an average investor. The asset mix changes over time, becoming more conservative as the investor's financial milestone draws closer.

The change in asset allocation over time is called the **glide path** which Manulife designed specifically for these funds.

The glide path's objectives include:

- To maximize wealth accumulation prior to target date
- To minimize risk as the target date approaches
- To make wealth last long enough to support any financial needs beyond the chosen target date

## Top Five Holdings

Bond Pool		Short-Term Bond Pool	
FXTN 03/04/27	14.83%	Manulife Stable Income Fund Class I	35.81%
FXTN 08/12/25	12.87%	FXTN 09/09/25	8.04%

## Market Review

The Philippine Stock Equity index (PSEi) increased by around 3.5% to 6,793. The equity market was up almost around 9% earlier in the month before capping the gains in the last few trading days in January due to profit taking and index rebalancing.

January inflation further accelerated to 8.7% year on year from around 8.1% in December. The higher prices of electricity, housing and especially food pushed inflation higher during the period. According to the government, they are expecting that the January inflation is already the peak and could potentially decelerate going forward. Meanwhile the Bangko Sentral ng Pilipinas mentioned that they could hike another 50bps by the end of 1Q23 and stop at 6% to 6.5% policy interest rates for now. Meanwhile they are looking to reduce 200bps in reserve ratio requirements, potentially reducing the capital restrictions on lending for financial institutions. Lastly, the unemployment rate stood at 4.3% in December which remains significantly below historical average.

The bond rally gathered pace as we entered the new year, with yields falling by 50-100bps in January. Investors turned more optimistic on local bonds this year even as inflationary risks continue to outweigh growth risks domestically, with the latest inflation print of 8.1% in December and GDP growth of 7.2% in the fourth quarter. After staying light the past few years, investors are looking forward to a more benign bond market environment, with both the Federal Reserve and Bangko Sentral ng Pilipinas anticipated to end their monetary policy tightening cycle soon.

## Outlook

We have a neutral view on Philippine Equities as strong corporate earnings is offset by macroeconomic headwinds. Consumer domestic consumption remains resilient as early indicated by 4Q22 results from the banks and consumer staples. In addition, the equity market's valuations remain attractive as it is still trading at around 13.5x forward price to earnings, still below historical average of around 15x. However, the macroeconomic picture remains challenging given that inflation remains on the upward trend and casts a shadow on the sustainability of consumer demand. In addition, the Bangko Sentral ng Pilipinas raised policy rates by another 50bps, potentially putting more pressure to growth in the medium term.

The seemingly over-enthusiastic market and upcoming 5.5-year Retail Treasury Bond (RTB) issuance this month may lead to increased volatility in the short-term. Similar to past RTB issuances, we expect the upcoming issuance to be a jumbo size of around P400B. Nevertheless, our expectations are for yields to continue with its downtrend this year especially with rising global growth risks and for any upward correction in yields to be shallow.

---

The investment fund option for The Manufacturers Life Insurance Company's variable life insurance product is managed by Manulife Investment Management and Trust Corporation.

The Fund mentioned in this document is specific to variable life insurance contracts and is not considered a mutual fund. Yields depend on interest and foreign exchange rate levels, both of which may fluctuate. Other factors that affect yield include changes in the credit standing of the issuers and changes in the value of the stocks and dividends received. Further, investments of the Fund may provide that their values be determined based on prices or yields of other securities, instruments or foreign currencies, and such provisions may result in negative fluctuations in the value of these investments and, in turn, the Fund's yields. Thus, the performance of the separate account(s) is not guaranteed and the value of the policy could be less than the capital invested. THE VARIABLE LIFE POLICYHOLDER SHALL BEAR ALL INVESTMENT RISKS. Past performance of the Fund is not necessarily indicative of future performance. Yields are not guaranteed.
