

# Peso Wealth Optimizer Fund 2036

An investment fund option for variable life insurance products of **The Manufacturers Life Insurance Co., (Phils), Inc.**

## Investment Objective

The Fund seeks to maximize long-term capital growth while managing the risk of capital erosion as the target date approaches through a dynamic rebalancing of exposure to diversified portfolios of peso-denominated fixed income securities and securities listed on the Philippine Stock Exchange and/or pooled funds that invest in these securities and other liquid fixed income instruments.

Past performance is not an indication of future results. Information about the portfolio's holdings, asset allocation, or country diversification is historical and is not an indication of future portfolio composition, which will vary.

## Why Peso Wealth Optimizer Funds?

Investing through a target date approach simplifies asset allocation for an average investor. The asset mix changes over time, becoming more conservative as the investor's financial milestone draws closer.

The change in asset allocation over time is called the **glide path** which Manulife designed specifically for these funds.

The glide path's objectives include:

- To maximize wealth accumulation prior to target date
- To minimize risk as the target date approaches
- To make wealth last long enough to support any financial needs beyond the chosen target date

## Top Five Holdings

Bond Pool		Short-Term Bond Pool	
FXTN 08/12/25	13.71%	Manulife Stable Income	
FXTN 03/09/24	10.15%	Fund Class I	36.23%

## Market Review

The PSEi lost 631 points and ended July at 6,270.23 points, down 9.2%. After briefly touching the 7,000-point level in early July, the market reversed course following government's pronouncements that Metro Manila will be back to stricter mobility measures beginning August 6 to contain the spread of the Delta variant. The two-week Enhanced Community Quarantine (ECQ) will restrict dine-in and public transport as well as limit travel, impacting mobility. Contributing further to the market's drop was the peso's continued weakness versus the US dollar. For the month, the peso declined a further 2.4%, and settled above the Php50/US\$ level at P50.006/US\$. Foreign outflows continued in July at \$182 Mil, bringing the YTD total to US\$1.73 Bil.

The country's credit rating outlook was revised to negative from stable by Fitch citing the impact of the pandemic on the economy. It affirmed the country's long-term foreign currency issuer default rating (IDR) at "BBB", a notch above investment grade. The credit rating agency lowered its GDP forecasts to 5% from 6.3% for 2021 while expecting growth to pick up to 6.6% in 2022 and 7.3% in 2023.

Price pressures eased as inflation slowed down to 4.0% in July, sustaining the downtrend seen in the last three months, as various government measures to address food supply shortages started to have an impact. On the fiscal front, the Philippines' budget deficit reached P716 Bil for the first six months and is tracking below the government's target due to underspending.

Concerns on the rise in Covid-19 cases due to the Delta variant has resulted in Metro Manila, including nearby provinces and select cities, to be placed under the Enhanced Community Quarantine (ECQ) for two weeks. ECQ is the strictest category of lockdown and this is the third time since the start of the pandemic that the Philippines is revisiting this category. Moving forward, this lockdown may dampen growth prospects for the Philippines and may keep investor sentiment lukewarm in the near term. The Philippine government targets to vaccinate 30% of the population by end of August as the country continues to lag the vaccination rates in the region.

## Outlook

Although the arrival of the Delta variant can potentially delay the country's exit from the pandemic, we remain optimistic long term as we believe the reopening will get back on track post the new mobility restrictions vis a vis increasing vaccination rates. Our sector preferences remain to be on cyclicals such as Financials and Real Estate. However, we remain cognizant of the global headwinds such as rising oil prices, a weaker currency and the prospect of higher interest rates.

Local bond yields for July were slightly lower as inflationary pressures from rising oil prices has abated after the OPEC and its allies have settled deals to increase output. July inflation printed at 4%, less than June's 4.1%, on base effects coupled with lower meat and transport prices. In this regard, we expect local inflation to continue to moderate for the second half of 2021. With local inflation finally within the Bangko Sentral ng Pilipinas' target range and the current flush liquidity environment, we expect the Monetary Board to keep both policy rates and Reserve Requirement Ratio (RRR) steady at its August 12 meeting. Against this backdrop, we will keep the neutral duration positioning vis-à-vis the benchmark as we continue to monitor the local and global developments.

---

The investment fund option for The Manufacturers Life Insurance Company's variable life insurance product is managed by Manulife Asset Management and Trust Corporation.

The Fund mentioned in this document is specific to variable life insurance contracts and is not considered a mutual fund. Yields depend on interest and foreign exchange rate levels, both of which may fluctuate. Other factors that affect yield include changes in the credit standing of the issuers and changes in the value of the stocks and dividends received. Further, investments of the Fund may provide that their values be determined based on prices or yields of other securities, instruments or foreign currencies, and such provisions may result in negative fluctuations in the value of these investments and, in turn, the Fund's yields. Thus, the performance of the separate account(s) is not guaranteed and the value of the policy could be less than the capital invested. THE VARIABLE LIFE POLICYHOLDER SHALL BEAR ALL INVESTMENT RISKS. Past performance of the Fund is not necessarily indicative of future performance. Yields are not guaranteed.
