Outlook and Strategy

In 2025, equity markets across Asia ex Japan delivered uneven performance against a backdrop of heightened uncertainty. Growth in generative AI investments drove trades and high market concentration, particularly among companies in North Asia's generative AI supply chain. We anticipate another year of uneven performance across Asia ex Japan equities in 2026. North Asia is likely to maintain its momentum, driven by rapid advancements in the technology sector, while the risk-reward profile of South Asian equities is becoming increasingly attractive despite near term growth headwinds.
