Outlook and Strategy

Most ASEAN markets lagged in 2025. Investment sentiment was weighed down by a weakening earnings outlook, soft domestic consumption, political uncertainties in Indonesia, Thailand, and the Philippines, and lingering global trade policy risks. Rising competition from Chinese companies entering various ASEAN sectors further pressured local firms' earnings. Export-oriented corporates have delayed capacity expansion amid uncertainty over the potential impact of US tariffs. Despite these challenges, we believe coordinated efforts by governments, central banks, and corporates are underway to navigate these headwinds.
