Outlook and Strategy

Though the BSP has indicated it may be nearing the end of its rate cutting cycle, we remain constructive on the bond market. A less accommodative monetary policy stance is inherently disinflationary, which supports our positive view. With this shift, 2026 inflation could come in lower than previously anticipated (BSP forecast: 3.2%). Further, with the government downgrading its GDP forecast to 5-6% from 6-7%, the local yield curve may still have room to decline and could potentially flatten.

Investment Policy / Prospective Investment

Pursuant to the foregoing objectives, the Trustee, with full discretionary powers, may invest and reinvest the assets of the Fund in: (1) Securities issued by the Republic of the Philippines and government-owned or controlled entities including the BSP; (2) Other liquid fixed income instruments including term deposits; (3) Other investment allowed under the regulations issued by the BSP. The target modified duration of the Fund is 0.25 years with a max modified duration of less than 1 year.
