Outlook and Strategy

With global inflation cooling and further rate cuts on the horizon, real estate equities and REITs are likely to remain in favor. After positive performance in 2025, Asia Pacific ex-Japan REITs are set for a pivotal transition from a period of rate-driven relief to a phase of growth revival. Lower benchmark interest rates should lead to interest cost savings and improve their relative appeal against other yield instruments. With progressive interest savings going into 2026, core distribution income growth should improve further for Asia REITs.
