WHO IS THIS PRODUCT SUITABLE FOR?

This Sub-Fund is only suitable for investors who:

- seek to maximize total returns from a combination of income generation and capital appreciation; and
- are comfortable that the price and value of the Shares as well as any derived or accrued income may fall or rise, with potential loss of the original amount invested.

Investors should consult their financial advisers if in doubt on whether the Sub-Fund is suitable for them.

Refer to paragraph 6.2 "Investment Objective and Policy of the Sub-Funds" of the Singapore Prospectus and Appendix 1 "Information on the Sub-Funds" of the Luxembourg Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a Sub-Fund of Manulife Global Fund, an umbrella structured, open-ended investment company which qualifies as a *société d'investissement à capital variable* under the law of 10 August 1915, as amended, of the Grand Duchy of Luxembourg. The Fund qualifies as a UCITS.
- Under normal circumstances, the Sub-Fund intends to declare interim dividends at least once every calendar month after the end of the relevant calendar month, or at other time(s) to be determined by the Directors, upon the commencement of dealing in this Class of Shares. The amount of dividends (if any) is not guaranteed. No dividends will be paid for Class AA Acc Shares.
- In respect of MDIST (G) Shares of the Sub-Fund, dividends will be distributed out of realized gains, capital and/or gross income while charging all or part of their fees and expenses to capital (i.e. payment of fees and expenses out of capital).
- Any distribution involving payment or effective payment of dividends out of the Sub-Fund's capital may result in an immediate decrease in the NAV per Share of the relevant Class of the Sub-Fund.

Refer to paragraph 1.1 "The Company" of the Singapore Prospectus and Appendix II "Statutory and General Information" of the Luxembourg Prospectus for further information on features of the product.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the Sub-Fund's assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

Refer to paragraph 8 "Risk Factors" of the Singapore Prospectus and section 5 "General Risk Factors" and Appendix I "Information on the Sub-Funds" of the Luxembourg Prospectus for further information on risks of the product.

Market and Credit Risks

- <u>You are exposed to investment risk.</u> The Sub-Fund is subject to substantial market fluctuations and to the risks inherent in all investments. The Sub-Fund may fall in value and therefore investors may suffer losses.
- <u>You are exposed to interest rate risk.</u> When interest rates rise on certain currencies that the bonds are denominated in, the value of the bonds may reduce, resulting in a lower value for the relevant portfolio.
- <u>You are exposed to credit risk.</u> The Sub-Fund is exposed to the risk that a debt issuer will default or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline.
- <u>You are exposed to emerging markets risk.</u> In respect of certain emerging economies or markets in which the Sub-Fund may invest, it may be exposed to higher risks than in developed economies or markets.

Liquidity Risks

- <u>You can only redeem your investment on Dealing Days.</u> The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through the Sub-Fund.
- <u>Your redemption request may be deferred.</u> Redemption requests in excess of 10% of the total number of shares on any Dealing Day may be deferred to the next Dealing Day, when such redemptions will be effected in priority to later

requests. Further, payment of redemption proceeds to a single Shareholder which are in excess of US$500,000 may be deferred for up to seven Dealing Days after the relevant settlement day.

Product Specific Risks

- You are exposed to risks associated with investing in China. The Sub-Fund is exposed to mainland China investment risks, mainland China tax and RMB Currency and Conversion Risks.
- You are exposed to high-yield bonds/debt securities rated below investment grade or unrated risk. Debt securities rated below investment grade or unrated are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than high-rated debt securities.
- You are exposed to risks associated with investing in debt instruments with loss-absorption features. Debt instruments with loss-absorption present more significant risks relative to traditional debt securities. Investments in securities with loss-absorption features may also expose investors to liquidity, valuation and sector concentration risks.
- You are exposed to risks of investing in distressed securities. The Sub-Fund may invest in distressed securities, which are securities of issuers that are encountering a variety of financial or earnings problems, including issuers with substantial capital needs or negative net worth or issuers that are, have been, or may become, involved in bankruptcy or reorganisation proceedings; issuers for which there is a reasonable expectation of default; and/or issuers who have already defaulted. Distressed securities involve significant risk. Such investments are highly volatile.
- You are exposed to financial derivative instruments (FDIs) risk. The Sub-Fund may use FDIs for the purposes of investment, efficient portfolio management and/or hedging and will therefore be subject to a greater extent to risks associated with investments in FDIs. Although the use of FDIs in general may be beneficial or advantageous, FDIs involve risks which differ from, and are, possibly, greater than the risks associated with traditional securities investments. The risks presented by FDIs include, but are not limited to, management risk, market risk, credit risk, liquidity risk and leverage risk.
