KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the Sub-Fund's assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

Refer to paragraph 8 "Risk Factors" of the Singapore Prospectus and section 5 "General Risk Factors" and Appendix I "Information on the Sub-Funds" of the Luxembourg Prospectus for further information on risks of the product.

Market and Credit Risks

- <u>You are exposed to investment risk.</u> The Sub-Fund is subject to substantial market fluctuations and to the risks inherent in all investments. The Sub-Fund may fall in value and therefore investors may suffer losses.
- <u>You are exposed to equity market risk.</u> The Sub-Fund's investments in REITs and equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.
- <u>You are exposed to currency risk.</u> The Sub-Fund's assets may be invested primarily in securities denominated in currencies other than U.S. Dollars and the Sub-Fund may receive income or realization proceeds from these investments in those currencies, some of which may fall in value against U.S. Dollars.

Liquidity Risks

Further, payment of redemption proceeds to a single Shareholder which are in excess of US$500,000 may be deferred for up to seven Dealing Days after the relevant settlement day.

Product Specific Risks

- You are exposed to risk of investments in REITs. The Sub-Fund may invest in securities of REITs, real estate companies and other entities affected by the risks associated with the direct ownership of real estate. The major risks can be attributed to a decline in real estate values, the possibility that the owners of real estate could default on mortgage payments resulting in the loss of property and environmental liability, and rise of interest rates. The value of this Sub-Fund may fluctuate in response to movements in real estate markets. Since this Sub-Fund focuses on a single sector of the economy, its performance depends in large part on the performance of the real estate sector.
- You are exposed to financial derivative instruments (FDIs) risk. The Sub-Fund may use FDIs for the purposes of investment, efficient portfolio management and/or hedging and will therefore be subject to a greater extent to risks associated with investments in FDIs. Although the use of FDIs in general may be beneficial or advantageous, FDIs involve risks which differ from, and are, possibly, greater than the risks associated with traditional securities investments. The risks presented by FDIs include, but are not limited to, management risk, market risk, credit risk, liquidity risk and leverage risk.
