KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the Sub-Fund's assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

Refer to paragraph 8 "Risk Factors" of the Singapore Prospectus and section 5 "General Risk Factors" and Appendix I "Information on the Sub-Funds" of the Luxembourg Prospectus for further information on risks of the product.

Market and Credit Risks

- <u>You are exposed to investment risk.</u> The Sub-Fund is subject to substantial market fluctuations and to the risks inherent in all investments. The Sub-Fund may fall in value and therefore investors may suffer losses.
- <u>You are exposed to interest rate risk.</u> When interest rates rise on certain currencies that the bonds are denominated in, the value of the bonds may reduce, resulting in a lower value for the relevant portfolio.
- <u>You are exposed to credit risk.</u> The Sub-Fund is exposed to the risk that a debt issuer will default or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline.

- You are exposed to emerging markets risk. In respect of certain emerging economies or markets in which the Sub-Fund may invest, it may be exposed to higher risks than in developed economies or markets.

Liquidity Risks

- You can only redeem your investment on Dealing Days. The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through the Sub-Fund.
- Your redemption request may be deferred. Redemption requests in excess of 10% of the total number of shares on any Dealing Day may be deferred to the next Dealing Day, when such redemptions will be effected in priority to later requests. Further, payment of redemption proceeds to a single Shareholder which are in excess of US$500,000 may be deferred for up to seven Dealing Days after the relevant settlement day.

Product Specific Risks

- You are exposed to risks associated with investing in China. The Sub-Fund is exposed to mainland China investment risks, mainland China tax, risks associated with investments via Bond Connect and RMB Currency and Conversion Risks.
- You are exposed to sustainable investing risk. Investing primarily in investments of issuers demonstrating sustainability characteristics ("sustainable investment") carries the risk that, under certain market conditions, the Sub-Fund may underperform funds that do not utilize a sustainable investment strategy.
- You are exposed to sustainability policy risk. The Sub-Fund's sustainable investment policy could cause it to perform differently compared to similar funds that do not have such a policy. The exclusionary criteria related to this policy may result in the Sub-Fund forgoing opportunities to buy certain securities when it might otherwise be advantageous to do so, or selling securities for sustainability reasons when it might be otherwise disadvantageous for it to do so.
- You are exposed to financial derivative instruments (FDIs) risk. The Sub-Fund may use FDIs for the purposes of investment, efficient portfolio management and/or hedging and will therefore be subject to a greater extent to risks associated with investments in FDIs. Although the use of FDIs in general may be beneficial or advantageous, FDIs involve risks which differ from, and are, possibly, greater than the risks associated with traditional securities investments. The risks presented by FDIs include, but are not limited to, management risk, market risk, credit risk, liquidity risk and leverage risk.
